edgehancer

Takes your pixels to the edge

Overview

Fixel EdgeHancer is an **Edge Enhancement** filter.

EdgeHancer features **novel algorithm to enhance and emphasize edges** in video frames and images.
Unlike "classic" sharpeners, *EdgeHancer* **emphasizes the edges exclusively** instead of increasing the contrast of the surrounding pixels.

Fixel EdgeHancer is **Multi CPU accelerated** and compatible with computers (CPU) with **SSE4** and Up and 64 Bit OS Only.

+ Radius		Controls the radius which defines an edge. Higher values emphasizes larger edges.
+ Threshold		Limits the noise amplification.
+ Intensity		Overall intensity of the effect.
+ Preview		Enables / Disables the "Live View" of the current parameter combination.
+ History Pane		Allows the user go back and forth between parameters combinations.

Thank You !

Thank you for buying Fixel Algorithm's product.
